SUMMARY

Machine Learning Engineer with 1.5+ years of industry experience building ML forecasting models, real-time analytics dashboards, and secure cloud-based applications using Python, AWS, Flask, Docker, and CI/CD pipelines. Strong foundation in SOC operations, incident response, and threat detection.

EXPERIENCE

Shark Analytics Pvt. Ltd.

Jan 2024 – Dec 2024

Machine Learning Engineer

Hybrid, India

- Engineered ML models using TensorFlow and Scikit-learn to forecast stock price movements and market trends with 90%+ accuracy, leveraging historical and live market data.
- Built automated data pipelines to fetch and process real-time and historical stock data, reducing manual preprocessing by 40% and enabling continuous model retraining.
- Developed real-time dashboards visualizing live market data and forecasted trends, supporting faster trading decisions.

Shark Analytics Pvt. Ltd.

Jul 2023 – Nov 2023

Python Developer Intern

Pune, India

- Developed real-time dashboards used by 20+ traders, improving response time to market changes by 60%.
- Integrated APIs and improved ML pipelines to increase model precision to 90% in production.

Feynn Labs

Jul 2022 – Oct 2022

Machine Learning Intern

Pune, India

- Spearheaded a team of four to complete three ML projects ahead of deadline with 85%+ model accuracy.
- Implemented advanced data mining techniques on 1M+ customer data points, driving a 30% improvement in targeted marketing campaigns.

EDUCATION

Dublin Business School

Jan 2025 – Jan 2026

M.Sc in Cybersecurity – First Class Honours (69.83%)

Dublin, Ireland

- Thesis: Predictive Security Incident Forecasting in Cloud Environments.
- Coursework: Network Security & Cryptography, Incident Response & Digital Forensics, Risk Management, Cloud Security, Secure Systems Development, Machine Learning for Security.

AISSMS Institute of Information Technology

Jun 2020 – May 2024

B.E. Electronics and Telecommunication

Pune, India

- CGPA: 7.96
- Coursework: Data Structures & Algorithms, Computer Networks, Embedded Systems, Digital Signal Processing.

PROJECTS

MSc Thesis: Predictive Security Incident Forecasting in Cloud Environments

- Benchmarked ARIMA, Prophet, LSTM and GRU on 2.5M+ UNSW-NB15 network flows for cyber-attack intensity prediction; LSTM achieved RMSE 86.6, 99.7% accuracy, F1 above 0.98.
- Delivered a Flask/Dash SOC-style dashboard supporting incident response workflows: real-time threat forecasting, EDA visualisations, and early-warning alerting.

Automated Flask App Deployment

- Built a secure CI/CD pipeline (Docker, GitHub Actions, AWS EC2, Terraform, Ansible), reducing deployment time from 60 to under 10 minutes with zero-downtime releases.

SKILLS

Security: Threat Detection, Incident Response, Predictive Analytics, SOC Operations, SIEM concepts, Network Security, Anomaly Detection, Vulnerability Assessment

AI / ML: TensorFlow, Keras, LSTM, GRU, ARIMA, Prophet, Scikit-learn, XGBoost, Pandas, NumPy

Languages & Frameworks: Python, JavaScript, C/C++, Flask, Django, Plotly Dash

Cloud & DevOps: AWS EC2, Docker, Terraform, Ansible, GitHub Actions CI/CD, Git, Linux/Unix

Databases: PostgreSQL, MySQL, SQLite

CERTIFICATIONS, PATENTS & LEADERSHIP

Certifications: Google Cloud Career Practitioners Pathway | Python & Django (Udemy) | Data Science & ML (Udemy)

Patents: IoT-Based Power Theft Detection & Monitoring System (2024) | Automated Waste Segregation Apparatus (2022)

Leadership: President, TESLA Club, AISSMS IOIT (Aug 2021 – Feb 2023) — led a 15-member team, organised 10+ tech events, boosting student engagement by 60%.
